

转子端面三轴联动钻孔四工位全自动平衡机说明

Rotor end face three-axis linkage drilling four-station automatic balancing machine

简要说明 / Brief Introduction

- 广泛用于水泵及端面去重方式的产品平衡测量与修正，可联结转子生产线实现自动化生产。
- Widely used in product balance measurement and correction for pumps and end-face removal methods, which can be used to connect the rotor production line for automated production.

产品特点 / Features

- | | |
|-----------------|---|
| 1. 流水线自动上下料 | 1. Automatic loading and unloading of the assembly line |
| 2. 12寸人机界面 | 2. 12 inch human-machine interface |
| 3. 六轴联动，同时加工 | 3. Six-axis linkage, simultaneous processing |
| 4. 生产节拍快，一次降低率高 | 4. Production beat block, a high reduction rate |
| 5. 快速更换产品 | 5. Quick product change |
| 6. 软支撑高精度平衡测量系统 | 6. Soft support high-precision balance measurement system |

A4WZ1端面三轴联动钻孔四工位全自动平衡机

全自动五工位绕线转子尖刀去重平衡机说明

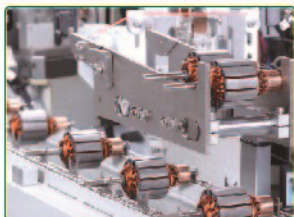

Five-station wound rotor pointed cutter weight-removing automatic balancing machine

简要说明 / Brief Introduction

- 广泛应用于各类家用电器，电动工具，起动机马达类的电机转子的平衡修正，产品自带自动流水线进出料，自动化程度极高。
- Widely used in all kinds of household appliances, electric tools, starter motor motor rotor balance correction, the product comes with automatic line in and out of the material, the degree of automation is extremely high.

产品特点 / Features

- | | |
|----------------------|--|
| 1. 流水线自动上下料 | 1. Automatic loading and unloading of the assembly line |
| 2. 友好人机交换界面 | 2. Friendly human-machine interface |
| 3. 产品应用范围广，产品换型快速简洁 | 3. Wide range of product applications, quick and easy product change |
| 4. 生产节拍快，一次降低率高 | 4. Rapid production beats, a high reduction rate |
| 5. 软支撑高精度平衡测量系统 | 5. Soft support high-precision balance measurement system |
| 6. 软硬件自主研发，设备可个性化功能强 | 6. Independent research and development of software and hardware, equipment can be personalized features |
